EXPERIENCE

Freelance Web Developer — Independent Contractor

2013 – Present

Building modern web applications with React, TypeScript, and Next.js. Specializing in PWAs, e-commerce solutions, and headless CMS architectures with focus on performance and accessibility.

shopOMS — Shopify Order Management System: Middleware OMS connecting a headless Shopify storefront to Odoo ERP for bespoke letterpress business cards. Next.js 16 App Router with Inngest serverless job queue, Supabase PostgreSQL event logging, and XML-RPC integration. Webhook-driven async processing with HMAC verification, rate limiting, retry logic (3-5 attempts), and real-time admin dashboard with sync event streaming.

B2B Powerhouse — Wholesale Platform: Three-system orchestration platform for premium gym equipment wholesalers. Next.js 16 App Router coordinating Shopify (commerce), Sanity CMS (content), and ERPNext (inventory/fulfillment). Implemented SKU mapping spine, idempotent webhook processing with pg-boss queue, server-side API proxies with 60s caching, and cookie-based B2B authentication. Delivered unified commerce experience with customer-specific pricing and AI reorder assistant.

Payload CMS + Next.js E-Commerce Platform: Composable e-commerce platform using Payload CMS v3 (Node.js/TypeScript) as headless backend with Next.js 15 App Router storefront. Stripe payment integration, content-block extensibility, category filtering with rich product pages, cart state management, and SEO-friendly metadata. PostgreSQL schema with REST API endpoints, production-ready deployment on Vercel.

Custom Shopify Online Store 2.0 Theme: Full design-system approach with SCSS tokens, CSS custom properties, and modular JSON templates. Flexible section architecture with reusable Liquid components, AJAX cart with variant logic, and WCAG-compliant mobile accessibility. Modern Shopify theme with clean Liquid structure and performant front-end behavior.

CraftCMS Full-Stack E-Commerce Platform: Complete e-commerce system combining Craft CMS 4 + Craft Commerce 4 with Next.js 14 React storefront. Products exposed via GraphQL and custom REST API modules. TypeScript + Tailwind frontend using Apollo Client + Zustand for state management with full cart and checkout flows.

HummingbirdPantry — Smart Pantry PWA: Multimodal, offline-first pantry manager with barcode scanning (ZXing), voice/camera hooks, and hardened dev setup with local HTTPS, secrets scanning, and Playwright/Vitest testing. Modular React + TypeScript (Vite) architecture with Zustand and Tailwind + Radix UI. Simplified item intake to "scan-and-stash," laying groundwork for AI-assisted lists and background sync.

Web Manager — WhyHunger

Aug 2012 – Mar 2013

Maintained large Symphony and WordPress sites including blog.whyhunger and usfoodsovereigntyalliance. Delivered organization's first responsive fundraising experience.

Assistant Manager — Phaidon Bookstore

2010 – 2011

Led fine-art sales team generating \$7k weekly revenue. Managed store operations and designed merchandising displays for discerning clientele.

Sales Coordinator — Miss K Greenhouses Inc.

2006 – 2009

Sold perennials, annuals, and tropicals at Union Square Greenmarket in NYC. Designed seasonal floor layouts and supervised customer service.
